

After School Activities Program at AISZ

At AISZ, we believe that education goes beyond academic study.

Our activities & athletics program is designed to provide students with diverse opportunities for enrichment, skill development, and personal growth, extending their learning beyond the classroom.

These activities are not just a complement to our curriculum - they are an integral part of our educational philosophy.

Whether it's through football, volleyball, basketball, cross country, or academic and creative pursuits like choir, Model United Nations (MUN), chess, pottery or dance, every activity encourages personal growth and helps students explore their interests, develop social skills, and the opportunity to model the values of the AISZ community:

Resilience, Responsibility, Kindness, and Respect.
